

Physician Opportunity — Join ENT Specialists of Alberta

Edmonton, AB | New, purpose-built specialty space within a full medical building | ENT Specialists Welcome

ENT Specialists of Alberta is expanding and we're inviting ENT specialists to build their practice alongside us in a brand-new, beautifully designed clinic.

A thriving medical floor

Our clinic sits directly across the hall from our established 8,000 sq ft ENT clinic, ENT Specialists of Alberta, anchored by a high-volume, fellowship-trained ENT group that also offers allergy testing and treatment. The same floor is also home to Auricle Audiology (hearing and audiology) and Sleep Specialists of Alberta (sleep medicine) — creating natural, built-in referral pathways and opportunities for coordinated, multidisciplinary care.

Inside Glenwood Health Centre

The clinic is located in Glenwood Health Centre, a fully medical building of approximately 50,000 sq ft housing a broad mix of on-site services, including:

- Cardiology
- Pulmonology / respiratory medicine
- Diagnostic imaging
- Dental clinics
- Physiotherapy
- Family medicine — five family physicians on the main-floor New Glenwood Medical Clinic

This concentration of specialties under one roof makes it an exceptionally supportive environment for an ENT specialist looking to establish or grow a referral-based practice.

Why join us

- **A stunning, modern clinic** — the interior was designed by the same team behind the Stantec Tower interiors: elegant, contemporary, and purpose-built for efficient specialty care.
- **Built-in referral network** — direct referrals from our family medicine network, plus strong volume from across the building and surrounding community.

- **Collaborative clinical opportunities** — join a high-volume, fellowship-trained ENT team managing a broad spectrum of otolaryngology, head & neck surgery, allergy, and facial reconstructive cases, with opportunities for collaboration and mentorship.
- **Patient-friendly location** — convenient west Edmonton address with excellent accessibility and ample free parking.

Who we're looking for

We welcome inquiries from:

- Otolaryngologists (ENT specialists) looking to establish or expand their practice in a collaborative, high-volume specialist environment.
- Established physicians seeking to relocate their practice.
- Residents and fellows graduating soon who are looking to build their career within a well-supported, multidisciplinary medical community.

How to apply

To learn more about the available space and discuss how your practice could join our growing community, please contact:
